Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 3/4/08 the change of address.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-15 is/are pending in the application.

6) Other:

1. Claims 1-15 are presented for examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In independent claims 1 and 15, the claims both contain system plus a computer program which is two separate statutory class types only one type of statutory class , either a system or a computer program must be selected per claim.

5. As to claim 1, the phrase “commodity-like” renders the claim indefinite because it is unclear what the metes and bounds of “commodity-like” are. The specification fails to provide definitive limitation of the phrase.

As to claim 2, the phrase “tree-like” renders the claim indefinite because it is unclear what the metes and bounds of “tree-like” are. The specification fails to provide definitive limitation of the phrase.

6. As to claim 1, line 5 “the value-added” should be changed to “a value-added”. There is insufficient antecedent basis for this limitation in the claim.

As to claim 2, line 3 “the branches” should be changed a “branches”. There is insufficient antecedent basis for this limitation in the claim.

7. As to claim 4, line 1 “the means of extracting” should be changed to “a means of extracting”. There is insufficient antecedent basis for this limitation in the claim.

As to claim 7, line 2 “the key root products” should be changed “key root products”.

There is insufficient antecedent basis for this limitation in the claim.

As to claim 11, lines 1 and 2 “the stored specifications” should be changed to stored specifications”. There is insufficient antecedent basis for this limitation in the claim.

As to claim 13, line 3 “the shelf life” should be changed to “a shelf life”. There is insufficient antecedent basis for this limitation in the claim.

7. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

8. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

9. A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under “Attorney and Agent Roster.” Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450.

Claim Rejections - 35 USC § 101

10. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. In independent claims 1 and 15, the claims recite a computer program. It should be noted that code(i.e., a computer software program) does not do anything per se. Instead it is the code stored on a computer that, when executed, instructs the computer to perform various functions. The following claim is a generic example of a proper computer program product claim; A computer program product embodied on a computer-readable medium and comprising code that, when executed , causes a computer to perform the following:

12. No prior art rejections are provided at this stage of the prosecution in view of the many 112 issues. See MPEP 2173.06
(Prior art rejection of claim rejected as indefinite):

“...where there is a great deal of confusion and uncertainty as to the proper interpretation of the limitations of a claim, it would not be proper to reject such a claim on the basis of prior art. As stated in *In re Steele*, 305 F.2d 859, 134 USPQ 292 (CCPA 1962), a rejection under 35 U.S.C. 103 should not be based on considerable speculation about the meaning of terms employed in a claim or assumptions that must be made as to the scope of the claims.”

It is extremely difficult to determine the metes and bounds of the claimed invention due to the numerous 112 issues presented above.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHAD RAPP whose telephone number is (571)272-3752. The examiner can normally be reached on Mon-Fri 11:00-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decay can be reached on (571). The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
